

The party was just warming up. All of a sudden, neighbor Joe drove onto his lawn with a new Bolens Husky compact tractor. You never saw a party break up faster. Most of my guests were clustered around the Husky. Joe explained how it cuts grass, totes carts, busts sod, moves dirt and cultivates. In winter, it cuts a wide path through the deepest snow.

The new Bolens Husky, with a Fast-Switch Attachment System, is ready for action in seconds. Lets you change powered attachments in less than a minute — without hitch-kits, belts, or tools. Joe gave us the perfect answer to spicing lawn and garden work with fun. Good ol' Joe, always the life of the party.
